7th October 2022

Dear Dave,

Re: Turnkey Instruments Ltd – MCERTS CERTIFICATION EXTENSION ‘Osiris Airborne Particle Monitor’

This document is to confirm that Turnkey Instruments Ltd has a contract in place with CSA Group Testing UK Ltd for the MCERTS certification of the ‘Osiris Airborne Particle Monitor’, an indicative ambient particulate monitor. This information will remain confidential and will not be disclosed to any third party unless CSA Group receives written permission from the manufacturer.

The contract is for the MCERTS certification extension of the ‘Osiris Airborne Particle Monitor’, an indicative ambient particulate monitor to include for the parameter PM_{2.5} against the MCERTS standard, ref. ‘Performance Standards for Indicative Ambient Particulate Monitors’, version 7, dated August 2017. The current MCERTS certificate reference is ‘MC090157/06’.

CSA Group are in receipt of an interim report from a third party, Finnish Meteorological Institute (FMI), dated August 2022.

Following receipt of acceptable test reports for both laboratory and field tests, the certification process involves the generation of an evaluation report and draft certificate. These documents are submitted along with other supporting documentation to the Certification Committee where a recommendation shall be delivered. Following a successful recommendation, the final stage will involve sign off by the certification body, CSA Group, and subsequently publishing of the MCERTS certificate.

Yours sincerely

A handwritten signature in black ink, appearing to read 'A. Young'.
